DETAILED ACTION

Allowable Subject Matter

1. Claims 21-44 (1-23) are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 21 (1), 33 (12), the most relevant prior art of record Yamada et al. (US Patent 6,011,960) teaches a mobile station searches for control channel on the private wireless telephone system (WTS) to which it was last registered and switches to cellular mobile telephone system (CMTS) mode when there are no detectable WTS signals. Yamada fails to teach a mobile station that searches in a first frequency band in an attempt to locate a control channel to the desired one of the residential wireless communication system or the private wireless communication system and, if a control channel of the desired one is not located within the first frequency band switches to obtain a next entry in the list to determine a next frequency band to be searched, in combination in all the recited limitations of claims 21 and 33 .

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hickes (US Patent 6,026,300) disclose method for service acquisition after a call release in a dual mode mobile telephone

Walstedt et al. (US Patent 6,748,214 B1) disclose robust manual search for autonomous private systems

Yazaki et al. (US Patent 6,108,541) disclose method for searching a control channel in a mobile

Bamburak et al. (US Publication 2002/0098848 A1) disclose method for selecting a preferable wireless communication service provider in a multi-service provider environment
